## Product Overview

We invest in companies with market caps generally between \$1 billion and \$10 billion at purchase that can sustain high rates of revenue and profit growth. Key attributes we look for in our holdings:

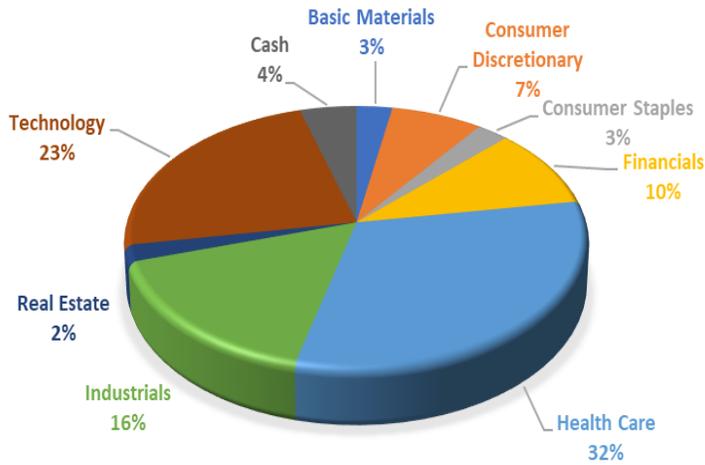

- Organic revenue growth substantially faster than the benchmark index
- Large and growing addressable target market
- Differentiated product offering allowing market disruption and leadership
- Strong, defensible competitive position
- Generally profitable with expanding margins
- Proven management team with a clear growth strategy

By investing in companies that have the potential to grow faster and more consistently than those in the benchmark we believe over portfolio will, over the long-term, perform better than the unmanaged index.

## Investment Performance as of 12/31/2020

\* As of December 31, 2020

Next Century Growth is an investment adviser registered with the SEC.

Past performance is not an indicator of future performance and the value of your account may increase or decrease over time. An investment in this strategy is speculative and involves substantial risks, including the possible loss of the entire investment and the potential for economic and market conditions and factors to materially adversely affect the value of the investments. Performance information presented may include "estimated" figures in circumstances where "final" figures are not yet available. The performance information provided above includes the reinvestment of all dividends and other earnings.

The Russell 2500™ Growth Index measures the performance of the small to mid-cap growth segment of the US equity universe. It includes those Russell 2500™ companies with higher growth earning potential as defined by FTSE Russell's leading style methodology. The Russell 2500™ Growth Index is constructed to provide a comprehensive and unbiased barometer of the small to mid-cap growth market. The index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small to mid-cap opportunity set and that the represented companies continue to reflect growth characteristics.

The NCG Small/Mid Capitalization Equity Composite contains portfolios investing primarily in the equity securities of small and medium-sized U.S. companies that the portfolio manager believes have substantial potential for high long-term growth. The portfolio manager seeks to identify the fastest growing and highest quality companies for investment. Investment results are measured versus the Russell 2500 Growth Index.
