Investment Philosophy

Our philosophy is to own the highest quality, fastest growing companies in America. We believe we outperform the benchmark by picking companies that have higher, more sustainable revenue and earnings growth on average than those in the benchmark index.

Strategy Overview

We invest in fast growing small and mid cap companies that can become much larger companies over our holdings period. Key attributes we look for in our holdings:

- Organic revenue growth substantially faster than the benchmark index
- Large and growing addressable target market
- Differentiated product offering allowing market disruption and leadership
- Strong, defensible competitive position
- Generally profitable with expanding margins
- Proven management team with a clear growth strategy

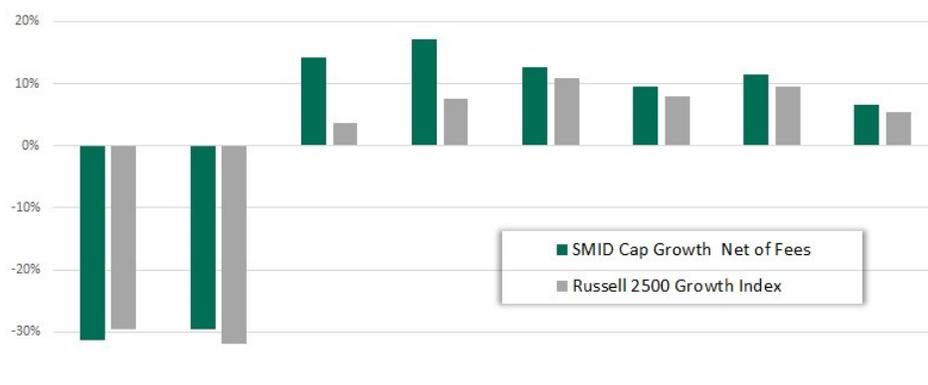

By investing in companies that have the potential to grow faster and more consistently than those in the benchmark we believe our portfolio will, over the long-term, perform better than the unmanaged index.

The Russell 2500™ Growth Index measures the performance of the small to mid-cap growth segment of the US equity universe. It includes those Russell 2500™ companies with higher growth earning potential as defined by FTSE Russell's leading style methodology. The Russell 2500™ Growth Index is constructed to provide a comprehensive and unbiased barometer of the small to mid-cap growth market. The index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small to mid-cap opportunity set and that the represented companies continue to reflect growth characteristics.

The NCG Small/Mid Capitalization Equity Composite contains portfolios investing primarily in the equity securities of small and medium-sized U.S. companies that the portfolio manager believes have substantial potential for high long-term growth. The portfolio manager seeks to identify the fastest growing and highest quality companies for investment. Investment results are measured versus the Russell 2500 Growth Index.

The net returns reflect the deduction of actual advisory fees. Prior to April 2004, monthly net returns reflect the deduction of a model advisory fee of 1.00%. This fee is the maximum annual advisory fee based upon the accompanying fee schedule in effect during each respective performance period for each portfolio in the composite, for net composite returns.
