

SMALL CAP GROWTH

March 31, 2024

Investment Philosophy

We seek to invest in the fastest growing and highest quality companies in America. We believe a portfolio consisting of high-quality growth companies, combined with a strong sell discipline, will lead to both compounding of portfolio value and better performance over the unmanaged index over the long-term.

Small Cap Growth Strategy Overview

We invest in fast growing and high quality small cap companies that can become much larger companies over our holdings period. Key attributes we look for in our holdings:

- Organic revenue growth faster than the benchmark index
- Companies that are addressing growing, large markets
- Differentiated product offering allowing market disruption and leadership
- Strong, defendable competitive position
- Generally profitable and expanding margins even as they grow rapidly
- Proven management team that can articulate a clear growth strategy

By investing in companies that have the potential to grow faster and more consistently than those in the benchmark we believe our portfolio will, over the long-term, perform better than the unmanaged index.

Characteristics

	Small Cap Growth Rep Account	Russell 2000 Growth Index
Est. Sales Growth (3-5 Year)^	17%	13%
Est. EPS Growth (3-5 Year)^	23%	19%

Annualized Performance *

Past performance is not an indicator of future performance and the value of your account may increase or decrease over time.

Firm History

Next Century Growth is an independent investment firm specializing in high growth equity portfolios. Based in Minneapolis, NCG utilizes a similar growth stock investment strategy across four products: Micro Cap, Small Cap, SMID Cap and Large Cap. The firm is primarily owned by its portfolio managers and has delivered investment results for clients since its inception in 1999.

**As of March 31, 2024*

Next Century Growth Investors, LLC is an investment advisor registered with the SEC.

Past performance is not an indicator of future performance and the value of your account may increase or decrease over time. An investment in this strategy is speculative and involves substantial risks, including the possible loss of the entire investment and the potential for economic and market conditions and factors to materially adversely affect the value of the investments. Performance information presented may include "estimated" figures in circumstances where "final" figures are not yet available. The performance information provided above includes the reinvestment of all dividends and other earnings. ^IPOs contributed significantly to performance in 1999.

The Russell 2000® Growth Index measures the performance of the small-cap growth segment of the US equity universe. It includes those Russell 2000® companies with higher price-to-value ratios and higher forecasted growth values. The Russell 2000® Growth Index is constructed to provide a comprehensive and unbiased barometer for the small-cap growth segment. The index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set and that the represented companies continue to reflect growth characteristics. The Russell 2000® Growth Index is not an actual investment and does not reflect the deduction of transaction charges and other expenses that your account must bear.

The NCG Small Capitalization Growth Equity Composite contains portfolios investing primarily in the equity securities of smaller U.S. companies that the portfolio manager believes have substantial potential for high long-term growth. The portfolio manager seeks to identify the fastest growing and highest quality companies for investment. Investment results are measured versus the Russell 2000® Growth Index.

The net returns reflect the deduction of actual advisory fees. Prior to April 2004, monthly net returns reflect the deduction of a model advisory fee of 1.00%. This fee is the maximum annual advisory fee based upon the accompanying fee schedule in effect during each respective performance period for each portfolio in the composite, for net composite returns.
